THINGS CHANGED

User and manager using same login page.

We decided to keep it simple for now that to have user and manager using the same login page. User and manager will be directed to different dashboards after log in depending on different login character.

Need longer time to start backend.

With the new application and platform we chose for our project, we need more a little bit more time to learn and get start.

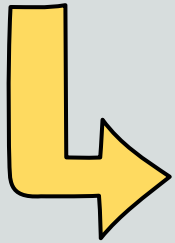

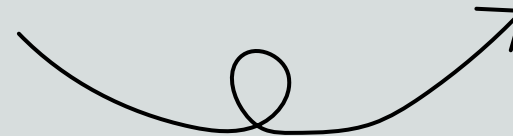

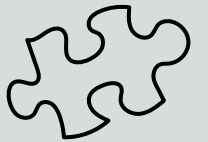

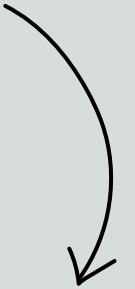

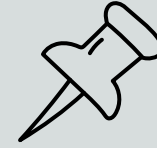

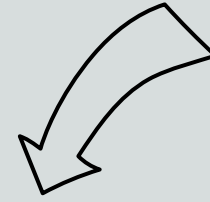

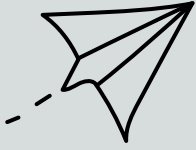

Adds Python to back-end as well.

We are familiar with Python and it does help with database analysis.

Supplementary TOOLS

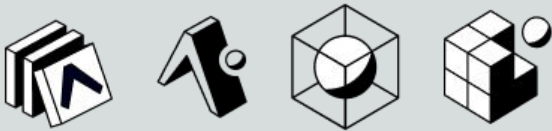

This is where you section ends. Duplicate this set of slides as many times you need to go over all your sections.

Supplementary TOOLS

 **Expo**

**MAKE
THINGS
EASIER**

Expo Go is an app where you can test your app in it (when you scan the QR Code after expo start, your app is launched inside Expo Go app).
